Education

Vellore Institute of Technology (VIT), Bhopal — **Bhopal, India**
B.Tech, Computer Science and Engineering | *CGPA: 8.7 / 10* — *2024 – 2028*

Experience

Web Development Intern — **Remote**
Prodigy InfoTech — *Sep 2026*

- Developed a full-stack **Artisanal Food Marketplace** using Java, Spring Boot, MongoDB, HTML, CSS, and JavaScript, implementing product listings, order management, and producer-consumer workflows.
- Designed and developed a **personal portfolio website** to showcase projects, technical skills, and development experience.
- Built a **House Price Prediction model** using Python and Linear Regression, applying machine learning to estimate property prices based on relevant features.

Projects

EZSplit – Bill Splitting and Expense Management System — **October 2026 – Present**
React, Vite, Node.js, MongoDB Atlas, Google OAuth 2.0, JWT, REST APIs | *Deployed on Vercel*

- Developed and deployed a **full-stack expense-sharing web application** enabling users to manage shared bills, track balances, and organize settlements among friends.
- Integrated **Google OAuth 2.0 authentication** and JWT-based authorization to support secure user authentication and protected application workflows.
- Built **RESTful APIs** and integrated MongoDB Atlas for persistent storage of user accounts, shared expenses, and settlement information.
- Implemented a **Google Pay payment initiation workflow** to help users settle outstanding balances and track payment status.
- Deployed the frontend on **Vercel** and the backend on **Render**, configuring production environment variables and CORS for communication between services.

Artisanal Food Exchange — Full-Stack Marketplace Platform — **2026**
Java, Spring Boot, REST APIs, MongoDB, HTML, CSS, JavaScript, Chart.js | *Deployed on Azure*

- Developed a full-stack marketplace connecting local artisanal food producers with consumers, supporting separate **Consumer** and **Producer** workflows.
- Built **Spring Boot REST APIs** with Spring Data MongoDB for product listings, orders, reviews, subscriptions, user management, and producer analytics.
- Implemented product discovery with **category filtering, keyword search, and geolocation-based "near me" filtering** using latitude/longitude distance calculations.
- Added recurring **weekly, biweekly, and monthly subscriptions**, order history, product ratings/reviews, and a **Chart.js producer analytics dashboard** for sales insights.
- Deployed the application to **Microsoft Azure**, making the complete marketplace publicly accessible through a production deployment.

VoiceCart AI – Multilingual AI Voice Grocery Ordering Platform — **2026**
React, Spring Boot, MongoDB, Groq, Whisper, Rime, Railway, Vercel

- Developed a **multilingual voice ordering system** supporting Hindi, English, and Hinglish voice commands.
- Integrated **Groq LLM and Whisper STT** for AI-based multi-item order and quantity parsing.
- Built a **Spring Boot REST backend** with MongoDB for order processing and shopkeeper management.
- Integrated **Rime TTS** and rule-based fallback for reliable voice interactions.
- Deployed the **React frontend on Vercel** and **Spring Boot backend on Railway** for live access.

Technical Skills

Languages:	C++, Java, Python, JavaScript, SQL
Web Development:	HTML, CSS, JavaScript, React, Spring Boot, REST APIs
Databases & Tools:	MongoDB, Git, GitHub, Docker
Data Science:	Pandas, NumPy, Matplotlib, SQL

Certifications

MongoDB Certification • **Microsoft Azure Fundamentals (AZ-900)** • **NPTEL — Cloud Computing** • **AWS — Machine Learning**
